FedRAMP Up With Splunk Cloud

Drive Confident Decisions and Actions With Splunk

Cloud Services Offer Game-Changing Benefits to Government Agencies, Including:

- Improved delivery of IT services
- Enhanced customer experience
- Reduced cost of maintaining IT infrastructure and managing IT services
- Strengthened mission assurance

Yet only 13% of 156 IT decision-makers* that were surveyed within the public sector are confident in their ability to modernize current systems and applications, including cloud/hybrid migrations.

According to a study of over 600 IT and security practitioners, migrating to the cloud is challenging due to the:

- Inability to achieve a strong security posture.
- Complexity in migrating from on-prem to cloud.
- Lack of visibility into resource utilization, metering and monitoring.

Splunk Cloud is the first FedRAMP-authorized data analytics and security analytics cloud service.

Splunk Cloud offers one of the fastest ways to leverage your data to solve operational complexity and security enable modernization.

- Little-to-no infrastructure costs – reduce the physical burden of maintaining servers and infrastructure on-site.
- Accelerate time-to-value by going live as fast as two days with 100% availability.
- Manage by Splunk experts, so your teams can focus on doing higher-value business.

Splunk Cloud delivers security out-of-the-box and is built to increase agility with low administrative overhead.

- Scalable architecture – seamlessly accommodate sudden or unexpected spikes in data volume.
- Operate Splunk Premium subscriptions, including ITSI and Enterprise Security, at the highest level of maturity and availability.

Beyond FedRAMP, Splunk Cloud adheres to one of the most rigorous security and compliance standards.
